

FESPA 2017

Mitsubishi Paper Mills Limited exhibits at FESPA 2017.

Exhibition: FESPA 2017
Date: May 8-12, 2017
Place: Hamburg Messe, Hamburg, Germany
Booth Number: C-55 (Hall A4)
URL: <https://www.fespa2017.com/>

<<Exhibits>>

- **Screen Meister MDS-360**, the screen-making machine
 - **TSM**, a thermal screen mask,
 - **Screen Tool Box**, dedicated software
- Inkjet Dye-sublimation Printing Technology

■ What's **Screen Meister MDS-360**?

Screen Meister MDS-360 is a CtS (Computer to Screen) system which was born in our history of having produced thermal plate-making machines.

- Recording images from computer to screen mask without film, MDS-360 does not need exposure or development process.
- With more than 1,200 dpi, the world highest resolution as thermal CtS, MDS-360 offers fine quality.
- Just 1 minute to output a maximum size(360x620mm) of image, MDS-360 meets the increasing demand for custom-made goods.
- MDS-360 drastically makes it possible to save cost and shorten delivery-time comparing to usual screen-making process; besides, it is eco-friendly.
- “Thermal Screen Mask” can be used with various kind of inks such as water-based, oil-based, UV, etc.
- Better usability is provided by “Screen Tool Box” dedicated software that can be handled intuitively.

Demonstration is to be held at booth C-55 (Hall A4).

*FESPA is one of the largest events covering screen and digital wide format, textile printing and signage, which attracts more than 23,000 visitors from over 130 countries worldwide.
